

## Self-lubricating Bronze bearings

Bronze self-lubricating bearings SELFOIL ® obtained by the sintering process can:

### TECHNOLOGY:

High accuracy  
uniformity in all series  
loads from 0 to 200 kg / cm<sup>2</sup>  
Speeds up to 30,000 r.p.m.  
temperatures of -20 ° C to +120 ° C

### OIL PRESERVATION:

paraffinic mineral oil viscosity grade ISO VG-68

### ALLOWABLE LOAD

$PV = 2.5 \text{ MPa} \cdot \text{m} / \text{s}$

### SECURITY:

Elimination seizure risk  
permanent oil film  
20 to 30% of the volume is impregnated with oil  
Quiet operation  
Low coefficient of friction

### ECONOMY:

Removing Oilers  
Avoid rear entertainment  
Existence permanent  
Immediate delivery  
More than 150 distributors in Europe
